

Mobile and Web Portal Developer (Rural Technologies Team)

Hiring organization
Ammachi Labs

Description

We are seeking a talented and motivated Mobile and Web Portal Developer to join our AI & Digital Solutions Team. As a Developer, you will be responsible for designing, developing, and maintaining user-friendly mobile applications and web portals that serve diverse user-needs. You will also contribute to integrating basic AI features to enhance the overall user experience. Your work will play a key role in building scalable, efficient, and innovative digital solutions that improve access, engagement, and service delivery. The ideal candidate will have hands-on experience in both mobile and web development, a foundational interest in AI technologies, and a passion for creating impactful applications.

Employment Type
Full-time

Date posted
May 7, 2025

Responsibilities

- ❑ Design, develop, and maintain high-performance mobile applications (iOS and Android) and responsive web portals.
- ❑ Collaborate with UI/UX designers and product teams to translate designs and wireframes into functional code.
- ❑ Integrate RESTful APIs and third-party services to extend application functionalities.
- ❑ Implement basic AI-powered features such as chatbots, recommendations, or image recognition to improve user interaction.
- ❑ Optimize applications and portals for speed, scalability, and responsiveness across devices and platforms.
- ❑ Write clean, scalable, and maintainable code following best development practices.
- ❑ Conduct thorough testing and debugging to ensure application quality and reliability.
- ❑ Stay updated on the latest trends in mobile, web development, and AI technologies.
- ❑ Work closely with cross-functional teams to define, design, and ship new features.
- ❑ Maintain clear and organized documentation of code, APIs, and development processes.

Qualifications

- ❑ Bachelor's or Master's degree in Computer Science, Software Engineering, or related field.
- ❑ Proven hands-on development experience of 2 to 3 years.
- ❑ Proven experience in mobile application development (React Native, Flutter, or similar) and web development (React, Angular, or similar frameworks).
- ❑ Strong proficiency in JavaScript, TypeScript, HTML, CSS, and modern front-end technologies.
- ❑ Familiarity with backend technologies (Node.js, Python, or similar) and database management.
- ❑ Basic knowledge of AI concepts such as machine learning, natural language processing, or computer vision is a plus.

- ☑ Experience with integrating APIs and managing data-driven applications.
- ☑ Proficiency in version control systems like Git.
- ☑ Strong problem-solving abilities and attention to detail.
- ☑ Excellent communication and collaboration skills.
- ☑ Willingness to learn new technologies and adapt to evolving project needs.
- ☑ Knowledge of deployment processes for mobile apps and web hosting platforms.
