

STEM Educator

Description

As a STEM Educator, you will play a vital role in designing and delivering hands-on STEM curricula while engaging with students, educators, and community partners. This role involves teaching, curriculum development, program coordination, and content creation to ensure our STEM initiatives remain impactful and scalable.

Application Deadline: April 15, 2025

Responsibilities

Develop and deliver engaging, hands-on STEM curricula covering Robotics, IoT, AI, and digital technologies.

Conduct interactive training sessions for school students, managing classrooms of up to 50 learners.

Build and maintain strong relationships with schools, educators, and community stakeholders to expand program reach.

Oversee logistics for STEM workshops, including scheduling, resource management, and reporting.

Create and manage digital content (blogs, social media posts) to enhance program visibility and engagement.

Research and evaluate STEM education methodologies to contribute to program innovation and improvement.

Travel across India as required to conduct training programs and workshops.

Qualifications

Bachelor's degree in Computer Science, Mechanical Engineering, Electronics Engineering, Robotics, or a related field.

Exceptional communication and presentation skills to effectively engage students, educators, and stakeholders.

Experience in teaching, curriculum development, or hands-on STEM training.

Technical expertise in electronics hardware (micro:bit, Arduino, ESP32, etc.).

Strong organizational skills with the ability to manage multiple programs and coordinate logistics.

Passion for STEM education and the ability to inspire young minds in a dynamic learning environment.
