

UI/UX Designer

Description

We are seeking a highly skilled UI/UX Designer to join our team, responsible for creating intuitive and engaging user interfaces while ensuring a seamless user experience. The ideal candidate should have a strong background in designing systems, wireframing, prototyping, and working within tight deadlines. This role requires close collaboration with developers, instructional designers, and other stakeholders to ensure cohesive design solutions that meet user needs and project objectives.

Responsibilities

Design user-centric interfaces, workflows, and experiences for various platforms.

Develop and maintain comprehensive design systems and style guides.

Create detailed wireframes, prototypes, and mockups to visualize and test concepts.

Collaborate with developers to ensure design feasibility and implementation accuracy.

Work closely with instructional designers to integrate educational content into user-friendly designs.

Identify and solve UX problems, ensuring that user needs are met throughout the project lifecycle.

Balance multiple projects and meet tight deadlines while maintaining design quality and consistency.

Stay updated on the latest UI/UX trends, design tools, and technologies.

Key Skills:

Experience with User Research, creating Personas, user flows

Expertise in UI/UX design tools (Figma, Adobe suite)

Experience with wireframing, prototyping, and creating design systems.

Strong understanding of design principles, usability, and user-centered design.

Excellent communication and collaboration skills.

Ability to prioritize tasks and work efficiently under tight deadlines.

Strong attention to detail and a problem-solving mindset.

Qualifications

Qualification:

A degree in a related field such as Graphic Design, Web Design, Human-Computer Interaction (HCI), or User Experience (UX) Design

Certifications: (optional)

Additional certifications or specialized courses in UI/UX design if any

Portfolio:

A strong portfolio showcasing Figma expertise, user-centered approach and case studies

Experience:

2 to 5 years

Experience working in UI projects is important—ranging from web apps, mobile
